

what you want

{ Interactive Promotions that Continue Promoting }

Get StickyDrive™ the revolutionary way to promote!

-  Any USB flash drive can be StickyDrive™ enabled
-  StickyDrive™ is software contained inside a flash drive that presents your company logo or message on the screen in addition to having your logo imprinted onto the drive
-  It has an integrated operating system on the flash drive that automatically connects the drive to the internet. This provides an effective marketing platform for communicating new products, services, offers, branding, and loyalty memberships
-  StickyDrive™-enabled flash drives offer the end user an easy-to-use automated file management system, and incorporated music player and photo viewer
-  You can update or change the content delivered to the end user at anytime. The software is programmed to automatically update each time the flash drive is connected to the internet
-  Records the number of uses so you can track your investment

Enable pen drives,
memory sticks,
mp3 and mp4 players

- Deliver your message inside and outside your flash drive
- StickyDrive™-enabled drives are an interactive marketing platform for promoting products and services with continued fresh, new content that can be delivered at any time
- Capture end-user data for other types of promotions
